Dear Mrs. Catlin,

The following is in response to your letter dated February 25th, 2008 in which your office made the request for any and all information regarding the Lead Superfund Site of Mr. James Stewart of 6752 Big River Heights Road, DeSoto, MO. The information requested was specifically directed at any information APAC Missouri Inc. may have regarding the transportation of possible lead contaminated soils from Mr. Stewarts property, which would have been hauled to Jefferson, Franklin and/or Washington counties.

After conducting an investigation with our Area Managers, Project Managers and Estimators who would have had any knowledge of activities of that nature, we found no evidence or have any information that would indicate that our company had any involvement in the movement of soil material from that location to any other location. Although APAC Missouri did overlay Hwy 21 several years ago, there were no borrow areas or other activities that would have required our company to actually load and haul soil material off of the site or the surrounding sites such as Mr. Stewarts property. The nature of our work was strictly to rebuild the existing highway a did not include transporting soil material to locations off of our work area.

Given our internal investigation of the activities associated with the general location indicated in your letter, APAC Missouri Inc. cannot find any indication that our company was involved with the loading, transporting or depositing of any soil materials as indicated in your letter.

Should you wish to further discuss this issue, please feel free to call Mr. Chris Schwedtmann, Environmental and Safety Director, APAC Missouri Inc. at 573-449-0886.

Sincerely,

APAC Missouri Inc.
